#### DETAILED ACTION

## Response to Amendment

1. Applicant's arguments against the rejection of the last
Office action are persuasive and, therefore, the finality of
that action is withdrawn in favor of the new ground of rejection
presented in the instant Office action.

## Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 2-3, 5-6, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Courty et al. US 4,381,415 in view of Petit et al. US 5,972,827.

Regarding claim 12, Courty '415 discloses a catalyst comprising delta alumina carrier (see column 3, lines 55-60), which would be a detectable amount, since it is specifically disclosed.

Courty fails to disclose a powder.

Petit '827 discloses a powder.

Art Unit: 1754

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the powder form of Petit in the oxychlorination catalyst of Courty because Petit discloses the powder form for an oxychlorination catalyst (title), wherein the performance of the catalyst is maintained constant over time (see column 2, lines 32-35).

Regarding claim 2, Convers '699 specifies the carrier selected from eta, gamma, chi, kappa, theta, delta, or rho alumina (see column 3, lines 55-60).

Regarding claim 3, Convers '699 discloses 0.05-0.6% copper and 0.1-1% potassium (see column 3, lines 34-38).

Regarding claims 5-6, Convers '699 discloses impregnation of the active elements on carrier (see column 3, lines 64-68) and copper chloride (see Example 3).

4. Claims 2-3, 5-6, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Convers et al. US 4,460,699 in view of Petit.

Regarding claim 12, Convers '699 discloses an oxychlorination catalyst comprising a gamma, eta, or delta alumina carrier (see column 4, lines 51-61), which would be a detectable amount, since it is specifically disclosed.

Convers '699 fails to disclose a powder.

Petit '827 discloses a powder.

Application/Control Number: 09/847,298

Art Unit: 1754

Page 4

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the powder form of Petit in the oxychlorination catalyst of Convers because Petit discloses the powder form for an oxychlorination catalyst (title), wherein the performance of the catalyst is maintained constant over time (see column 2, lines 32-35).

Regarding claim 2, Convers '699 discloses about 17.1% and 22.6% of the catalyst (see Examples 3-4).

Regarding claim 3, Convers '699 discloses 1-7 percent copper (see column 5, lines 25-26), lithium, sodium, potassium, rubidium, or cesium on a 0.05 to 1.0 molar basis relative to copper (see column 5, lines 29-35), and a surface area of 100-200 square meters per gram (see column 4, lines 62-66).

Regarding claims 5-6, Convers '699 discloses impregnating
1-7 percent copper (see column 5, lines 25-26 and Example 1),
lithium, sodium, potassium, rubidium, or cesium on a 0.05 to 1.0
molar basis relative to copper using copper chloride (see column
5, lines 29-35 and Examples), and a surface area of 100-200
square meters per gram (see column 4, lines 62-66).

### Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 1754

#### Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward M. Johnson whose telephone number is 571-272-1352. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley S. Silverman

Art Unit: 1754

can be reached on 571-272-1358. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 571-272-0987.

MM M. Johnson Primary Examiner Art Unit 1754
